PROFESSIONAL SUMMARY

Senior Frontend Developer with **5.3 years** of experience designing and building scalable, high-performance web applications using **Angular (v5 - v21), TypeScript, JavaScript, Angular material, RxJS, and NgRx**. Proven track record delivering enterprise-grade portals for millions of concurrent users, including **India's national e-Filing Income Tax platform**. Improved UI defect resolution to a **95%+ first-pass rate**, accelerated feature delivery by approximately **30%** through reusable component libraries, and optimized load performance through lazy loading and bundle-size tuning. Skilled at translating complex business requirements into pixel-perfect, WCAG-accessible interfaces under peak-traffic conditions.

KEY ACHIEVEMENTS

- Resolved **100+ UI defects** on a national tax portal with a **95%+ first-pass resolution rate**.
- Accelerated feature delivery by **approximately 30%** by building **10+ reusable UI components** adopted across 5+ portal modules.
- Supported **millions of concurrent taxpayer sessions** on India's **e-Filing Income Tax Portal** with **zero-downtime** data rendering.
- Provided **3 production Angular SPAs** and 3 premium ThemeForest admin templates sold to **thousands of global clients**.

CORE TECHNICAL SKILLS

Frameworks: Angular (v5-v21), RxJS, NgRx (State Management), Angular Signals

Currently Learning: ReactJS (Components, Hooks, REST API Integration) — self-directed learning

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, jQuery

Styling: SASS, LESS, Bootstrap 3/4/5, Angular Material, Prime NG, Responsive/Fluid UI

API & Data: RESTful API Integration, JSON, Observables, Promises

Tooling: Webpack, Gulp, npm, Bower, Git, VS Code, WebStorm, PhpStorm

Standards: WCAG 2.1 Accessibility, Cross-Browser Compatibility, Performance Optimization

AI-Assisted Development: Cursor.ai, Claude.ai, GitHub Copilot, ChatGpt Codex

PROFESSIONAL EXPERIENCE

Career Break – Health & Well-being

Dec 2025 – Apr 2026

- Took a planned career break to focus on a health issue (jaundice caused by a low blood count) and undergo treatment.
- Followed a structured medical treatment plan under physician supervision, with regular monitoring and check-ups.
- Prioritized full recovery through proper rest, diet, and follow-up care before returning to work.
- Declared fully recovered and medically fit to resume full-time professional responsibilities.
- Returning with renewed energy, focus, and enthusiasm to contribute to full-time frontend development work.

Senior Software Developer – Frontend

Mar 2024 – Oct 2025

Experis IT Pvt. Ltd. — India

Project: e-Filing Portal (IEC 2.0) — India's National Income Tax Portal (eportal.incometax.gov.in)

- Designed and built responsive ITR filing modules, dashboards, and scheduling workflows using **Angular 17, RxJS, NgRx, Signals**, Angular Material, Bootstrap, HTML5, and CSS3, improving user engagement across 5+ portal modules.
- Built a **dynamic form validation engine** covering PAN, TAN, 80C/80D/HRA deductions, and capital gains, cutting invalid submissions by streamlining validation across **millions of taxpayer sessions**.
- Shipped **10+ reusable UI components** (smart wizards, auto-complete, date pickers, data tables) adopted across 5+ portal modules, accelerating feature delivery by **approximately 30%**.
- Integrated **6+ REST APIs** for real-time tax computation, refund status tracking, and user profile management, enabling **zero-downtime data rendering** during peak filing season.
- Optimized Angular lazy loading and bundle sizes, measurably improving Largest Contentful Paint (LCP) during peak traffic periods serving millions of concurrent sessions.

- Enforced WCAG 2.1 accessibility standards and validated cross-browser compatibility across 4 major browsers — Chrome, Firefox, Safari, and Edge.
- Partnered with backend and QA teams across Agile sprints to resolve 100+ UI defects, achieving a 95%+ first-pass resolution rate.

Software Developer – Frontend

Aug 2023 – Oct 2023

Collabera Technologies Pvt. Ltd. — India

Project: GSK IMPACT – Benlysta & Dapro (Pharmaceutical Healthcare Platform)

- Crafted pixel-perfect, responsive UI pages from Figma/mockup designs for a regulated pharma platform supporting patient medical services.
- Connected **REST APIs** for patient data flows and client-side logic using **Angular components, services, and Observables, NGRX, RXJS**.
- Resolved critical UI/UX defects across core patient forms, improving usability and reducing user-reported issues.

Frontend Developer – Angular

Jun 2022 – May 2023

Empulse Research & Data Analytics Pvt. Ltd. — India

Projects: Sales & Operations Planning (SOP), Smyrna Crane Configurator, Smyrna Fire Configurator

- Architected and delivered 3 production **Angular SPAs (v9, v11, v14)** for e-commerce and logistics domains, handling complex routing, authentication/authorization, and data-binding flows.
- Built a truck/crane SOP planning tool with real-time delivery tracking dashboards and dynamic filtering, cutting manual planning effort for operations teams.
- Applied **NgRx state management and RxJS Observable** pipelines for real-time data synchronization across SPA modules.
- Established authentication and authorization flows (login, role-based guards) integrated with backend APIs.
- Leveraged Angular Material and Bootstrap 4/5 to deliver consistent, mobile-responsive UIs across all 3 projects.

UI Developer

Jan 2020 – May 2022

Maxis Software Pvt. Ltd. — India

Projects: Admire Admin, Core Plus Admin, Josh Admin Template (ThemeForest)

- Contributed to 3 premium ThemeForest admin templates using **HTML5, CSS3 (SASS), Bootstrap, JavaScript, jQuery, and Angular 8**, sold to thousands of global clients.
- Refactored legacy CSS to Material Design standards across 3 templates, improving code maintainability and UI consistency.
- Developed **multi-theme dashboards, data tables, charts, form components, and widget libraries** used by third-party developers.
- Managed frontend build pipelines using **Gulp, Webpack, and Bower**, reducing build times by streamlining task automation across the team.

EDUCATION

M.Tech (Master of Technology) — Kshatriya College of Engineering, 2016 (73.69%)

B.Tech (Bachelor of Technology) — Vijay Rural Engineering College, 2014 (72.30%)

Board of Intermediate — Shaankary Junior College, 2010 (94%)

High School (SSC) — ZPHS Ram Mandir, 2008 (88%)
